BOOK SYNOPSIS

Recognized as the classic resource in cartography, this text continues to integrate the latest modern technology with traditional cartographic principles. The balanced author team provides a solid conceptual foundation in the basic principles of cartography while introducing the newest technological advances which have greatly altered modern cartographic techniques. New features include a complete updating of topical data and a shift in emphasis from small-scale to all-scale maps. Systematic coverage is given to both theory and applications with all basic mapmaking tools presented including formulas, tables and constants.
