BOOK SYNOPSIS

Breakthrough Technique: Read Faster by Understanding Faster. Don't you hate it when reading takes so long... and yet you retain so little? Is this way of reading even worth your time? By learning to read with your whole brain -- not just the slow, step-by-step, analytical left side that handles word-recognition, but also your fast, parallel-processing, big-picture right brain -- you can reach new levels of reading and cognition. Learn to visualize whole ideas at a time, and turn reading into a truly engaging experience instead of a chore. Discover how to encourage the involvement of your powerful, silent, imaginative right-hemisphere and begin reading ideas rather than just words. Apply the conceptual abilities of your right brain to increase concentration, comprehension, and reading speed. Only faster comprehension, can lead to faster reading!! Reading IS comprehension. There is no reading without comprehension. The only way to really read faster, is by understanding faster. These new theories and techniques will have you reading faster by thinking faster. Read whole ideas at a time. Strengthen your comprehension. Sharpen your concentration. Reduce your vocalization. Improve your retention. Increase your speed.
